

## “Adoption of Evidence-Based Clinical Innovations: The Case of Buprenorphine Use by Opioid Treatment Programs”

### Research Questions & Methods

- From 2005 to 2011, **have opioid treatment programs’ use of buprenorphine changed?**
- **How are** the sociotechnical, organizational- managerial, market, and state regulation **models associated with adoption of buprenorphine?**
- Uses data from **two nationally representative surveys** of opioid treatment programs

### Findings

### TAKE-AWAYS

- ✓ This research suggests opioid treatment programs have increased their use of buprenorphine.
- ✓ Many factors can impact how organizations adopt evidence-based practices.
- ✓ It is important to understand how different factors impact implementation, from the individual-level to more wide-scale-levels.
